

**Product description**

Water-soluble defoamer that is used in the paint and printing ink industry. Gives no turbidity or haze and no paint or plating adhesion problems and maintains the defoaming properties.

**Typical chemical and physical properties**

Chemical nature	Proprietary blend of polyalkylene glycols and surface-active components.	
Appearance	Liquid	
Solubility	Soluble	
Water	Soluble	
Odour	Characteristic	
Density at 25°C	1,04 - 1,07	g/ml
Viscosity at 25°C	10 - 50	mPa.s
Water solubility	Soluble	

*This information is intended as a guideline only. For specifications please consult the Certificate of Analysis.*

**Application and treat level**

Markets	Coating industry Ink industry Cleaner industry Engineering industry Metalworking industry
Applications	Paints and lacquer Printing inks Floor polish- and cleaner Aqueous hydraulic fluids Aqueous metalworking fluids
Recommended dosage/usage	0,05 to 1,0 % wt. on total formulation <b>Suitable as incidental food contact</b>

**Key benefits**

**- Readily biodegradable -- APEO/NPEO free -- Free of MOSH/MOAH -- Free of amines -- Free of nitrates -- Free of nitrites -**

- Completely soluble in water; no turbidity or haze of the liquid phase in clear systems.
- Maintains the defoaming properties over a prolonged period of time.
- Metal surfaces are readily cleaned by rinsing with tap water.
- No paint or plating adhesion problems expected when the defoamer is applied.
- Effective over a wide pH range (2 to 12).
- Does not block filters and spray nozzles.

---

<b>Safety and Handling</b>	Please read Safety Data Sheet (SDS) before handling.
<b>Product Specification</b>	This information is available on request through our local representative.
<b>Packaging</b>	This information is available on request through our local representative.
<b>Storage</b>	The product should be stored at a temperature of no less than 10 °C and no more than 25 °C and away from light. For more safety details read the Safety Data Sheet (SDS)
