

## Typical chemical and physical properties

ADDAPT<sup>®</sup> Anticor<sup>™</sup> MPA is an aqueous high alkaline **copper** and **aluminium** anti-corrosion additive.

**It is a proprietary blend of coupling agents and organic amides.**

All constituents comply with the FDA regulation (incidental contact with foodstuff).

Appearance	Colourless liquid
Density at 25 °C	1.17 – 1.21 g/cm <sup>3</sup>
Viscosity at 25 °C	< 30 mPa·s
pH	min. 13
Solubility:	
Water	Soluble
Mineral oil	Insoluble

*This information is intended as a guideline only. For specifications please consult the Certificate of Analyses.*

## Applications and typical treat level recommended

Metal working fluids	0.1 to 0.5 % in the final, ready to use, solution
Hydraulic fluids - HF-C, HF-A	
High alkaline metal cleaners	

## Benefits

Offers excellent solubility in water.

Very effective inhibitor in any water-based system that comes into contact with different grades of copper and aluminium.

Controls “pitting” and inhibits other forms of oxidation of the metal surface.

Prevents aluminium corrosion in high alkaline cleaners.

Its use is not restricted by the water hardness.

**Safety and Handling** Please read Material Safety Data Sheet (MSDS) before handling.

**Product Specification** This information is available on request through our local representative.

**Packaging** This information is available on request through our local representative.

---

**Quality Policy** The objective of our quality policy is the continuous fulfilment of the internal and external requirements agreed upon with our partners with regards to everybody's performance.

The Quality System of ADDAPT<sup>®</sup> Chemicals BV is based on the principles of the NEN-EN-ISO-Standard 9001 : 2015.
