

Technical Data Sheet

Foamstop™ SIN 425 Defoamer – Food & Feed

Article number: Verification date: Version: FO82545 18/02/2025 2 1

Typical chemical and physical properties

Foam control agent specially formulated for the production of dairy products, potato (starch, French fries) and sugar processing. All ingredients comply with Kosher and the FDA code of federal regulations.

Blend of polyalkylene glycols.

Active content ~100%

Application and treat level

Markets Food and beverage industry

Applications Dairy production

Potato (starch, French fries) processing

Sugar production

Recommended dosage/usage Apply the product in its natural state by aspersion or by dosing

pump and adjust the initial dosage according to the requirements. May also be distributed with a water dilution system and or with a special metering system for automatic dosing in the fermentation, which means product will automatically added only when needed.

French Fries 20 - 100 ppm Sugar (diffusion) 20 - 100 ppm

Suitable as Food Processing aid and in compliance with FDA Title 21 CFR.

Key benefits

- Readily biodegradable -- Biobased -- Free of silicone oils -- Kosher -- Halal -
- Shows excellent performance in the control of foams and improves the flow and reduces viscosity of the medium.
- Very effective from temperatures of 15 °C to temperatures of around 90 °C.
- Very effective in cutting areas of the potato processing water temperatures from 20 to 45 °C.
- · Leaves no residues in the pipes or valves of the equipment used.
- Can be used in production steps of the sugar manufacturing, for example it can be used in the washing process (water ways).
