Benefits

Due to its very fine particle size, ADDAPT[®] SOL 30 shows excellent penetration in (semi-)porous substrates like dusting cement walls or plaster/gypsum board.

The emulsion is stable to the addition of pigments and fillers, and may be made more thixotropic by the incorporation of a suitable gelling agent.

ADDAPT[®] SOL 30 is developed for surfaces which have technical issues with chalking, efflorescence, adhesion and porosity.

ADDAPT[®] SOL 30 shows very good water resistance.

ADDAPT[®] SOL 30 is free from Alkylphenoethoxylates (APEO-free).
