Product description

Biodegradable multifunctional additive and effective aluminium corrosion inhibitor with good emulsifying properties.

| Typical chemical and physical properties Chemical nature | Proprietary mixture of surface tension active- and phosphonate derivatives. |
|---|---|
| Appearance | Yellow/brown liquid |
| Solubility Water Mineral oil | Emulsifiable Soluble |
| Odour | Characteristic |
| Density at 25°C | 1 - 1,04 g/ml |
| Viscosity at 25°C | 100 - 350 mPa·s |

This information is intended as a guideline only. For specifications please consult the Certificate of Analysis.

| Application and treat leve | l Markets | Lubricants industry Metalworking industry Constuction industry |
|----------------------------|--------------------------|--|
| | Applications | Industrial lubricants, greases and rust-preventive fluids Aqueous systems (after neutralisation) Metalworking fluids (oil- and water-based) Bitumen (asphalt) |
| | Recommended dosage/usage | 0,03 – 2,0 wt. % |
| | | |

Key benefits

- Readily biodegradable -

- Multifunctional corrosion protection of Al, Cu, Zn, Pb and Sn surfaces.
- Improves binding on wet gravel or sand (bitumen).
- · Easy to handle liquid, contains no diluents.
- Non-foaming.
