

Product description

Solvent free, ready biodegradable wetting agent which improves the wet-edge (open time) and water retention.

Typical chemical and physical properties

Chemical nature	Polyhydroxy amide in water.
Appearance	Liquid
Solubility	
Water	Miscible
Odour	Barely perceptible
Density at 25°C	1,13 - 1,18 g/ml
pH at 25°C	5,0 - 8,0
Viscosity at 25°C	<50 mPa.s

This information is intended as a guideline only. For specifications please consult the Certificate of Analysis.

Application and treat level

Markets	Coatings industry Plasters industry Concrete industry
Applications	(Exterior) textured masonry coatings Plasters (putz) Concrete/cement
Recommended dosage/usage	0,05 -2,0 % wt. based on total formulation

Key benefits

- **Readily biodegradable -- Biobased -- APEO/NPEO free -- Solvent free -**
- Exhibits excellent water retention properties; however after drying the water resistance is not affected.
- Wetting of pigment surfaces.
- Increases wet-edge (open time) of emulsion paints and lacquers.
- Plasticiser for concrete/cement.
- Non-foaming.
- No hazard (H) and precaution (P) labelling necessary.

Safety and Handling	Please read Safety Data Sheet (SDS) before handling.
Product Specification	This information is available on request through our local representative.
Packaging	This information is available on request through our local representative.
Storage	The product should be stored at a temperature of no less than 10 °C and no more than 25 °C and away from light. For more safety details read the Safety Data Sheet (SDS)

Quality Policy	<p>The objective of our quality policy is the continuous fulfillment of the internal and external requirements agreed upon with our partners with regards to everybody's performance.</p> <p>The Quality System of ADDAPT® Chemicals BV is based on the principles of the NEN - EN - ISO - Standard 9001:2015.</p>
