

Product description

Solvent-free, readily biodegradable wetting agent for aqueous lacquers and paints.

Typical chemical and physical properties

Chemical nature	Polyhydroxy amide in water.
Solubility	
Water	Miscible
Odour	Barely perceptible

Application and treat level

Markets	Coatings industry Ink industry
Applications	Coatings and lacquers Printing inks (OPV) Stains and primers
Recommended dosage/usage	0,5 -2,0 % wt. based on total formulation

Key benefits

- Readily biodegradable -- Biobased -- APEO/NPEO free -- Solvent free -

- The multifunctional nature allows to provide the necessary wetting properties for water based systems such as paints, adhesives, printing inks.
- Exhibits a high surface energy that leads to an excellent wetting of the (paper) coating without an increase of the water absorption (low COBB value).
- Provides the necessary wetting properties for water-based systems.
- Increases gloss and wet-edge (open time) of emulsion-based lacquers.
- Increases pigment wetting and grinding efficiency.
- Exhibits high surface energy properties.
- Non-foaming.
- Improves penetration.
- Improves the "FLOP" of Aluminium pigments.
- pH application range: 4 – 13.
- No hazard (H) and precaution (P) labelling necessary.

Safety and Handling	Please read Safety Data Sheet (SDS) before handling.
Product Specification	This information is available on request through our local representative.
Packaging	This information is available on request through our local representative.
Storage	The product should be stored at a temperature of no less than 10 °C and no more than 25 °C and away from light. For more safety details read the Safety Data Sheet (SDS)

Quality Policy	The objective of our quality policy is the continuous fulfillment of the internal and external requirements agreed upon with our partners with regards to everybody's performance. The Quality System of ADDAPT® Chemicals BV is based on the principles of the NEN - EN - ISO - Standard 9001:2015.
