

Product description

Defoamer/deaerator especially formulated for concrete and other industries such as the production of recycled paper/pulp.

Typical chemical and physical properties

Chemical nature	Proprietary blend of organophosphates and glycol ethers.
Solubility	
Water	Dispersible

Application and treat level

Markets	Concrete industry Paper industry
Applications	Concrete Paper
Recommended dosage/usage	Apply the product in its natural state by aspersion or by dosing pump and adjust the initial dosage according to the requirements. May also be distributed with a water dilution system and or with a special metering system for automatic dosing to the process, which means product will automatically added only when needed. 100 – 250 ppm

Key benefits

- Free of MOSH/MOAH -- Free of silicone oils -
- Shows excellent performance in the control of foams and improves the flow.
- Can be used to reduce the effects of too much air in concrete and bring the concrete back to its original strength.
- Show excellent alkali stability.
- Leaves no residues in the pipes or valves of the equipment used.
- Can be used in processing recycled paper in the chlorine dioxide process.
- Can also be used as in detergents for dish washing machines.
- The foam-control agent is more accurately called de-aerating wetting agent.
