#### Product description

Solvent-free, potassium silicate solution optimised with a hydrophobic component for use in aqueous systems such as renders (putz), textured masonry coatings and interior paints. It has a different stabilisation system compared to SilStab™ HL+

#### Typical chemical and physical properties

| Chemical nature   | Stabilised potass water. | sium silicate solution with a hydrophobic of |
|-------------------|--------------------------|--|
| Appearance        | Clear liquid             |  |
| Active content    | ~23,5%                   |  |
| Odour             | odourless                |  |
| Density at 25°C   | 1,10 - 1,40              | g/ml   |
| pH at 25°C        | 11,0 - 13,0              |  |
| Viscosity at 25°C | <50                      | mPa.s  |

| Application and treat level<br>Markets | Coating industry<br>Plaster industry  |
|--|---|
| Applications                           | Renders (putz)<br>Textured masonry coatings<br>Interior (wall) paints   |
| Recommended dosage/usage               | - Textured Masonry Coatings 0,5 – 10% wt based on total solids<br>- Renders (Putz) 0,5 – 10% wt based on total solids<br>- Interior Paint 2 – 8% wt based on total solids |
|  |   |

Key benefits

### - Readily biodegradable -- Preservative free -

• Highly stabilised and can be added to Render (Putz) and Coating formulations without coagulation problems; no additional stabilising additives are required. The stabilisation system differs from SilStab HL+.
 Optimized with a hydrophobic component and improves scrub resistance in Interior paints.

- Does not cause strong viscosity increase even after prolonged storage.
   Greatly increases surface hydrophobicity.
- Highly stabilised, no additional stabilising additives required.
   Silicifies surfaces high durability.
- High water vapour permeability.
  Low dirt pick-up.
- Hard and scratch-resistant surfaces.
- Affinity with mineral surfaces.
- Penetration in porous substrates.
- (High) water resistance.
- · Non-flammable.
- Non-yellowing/UV resistant.
- · Good compatibility with (styrene-)acrylic- or VA/VeoVa dispersions.
- Non-foaming.
