

**Product description**

Dispersion of polyethene and paraffin waxes in water. It is used in the paint industry, printing ink industry, shoe and leather care and paper industry. Provides very good water-repellent properties and scratch resistance. Exhibits matt gloss and improves surface smoothness. Highly suitable for use in aqueous coating systems.

**Typical chemical and physical properties**

Chemical nature	Emulsion of polyethylene and paraffin waxes in water.	
Appearance	Translucent liquid	
Active content	~30%	
Odour	Characteristic	
Solid content	29,5 - 30,5	wt%
pH at 25°C	9,0 - 10,0	
Viscosity at 25°C	<150	mPa·s

*This information is intended as a guideline only. For specifications please consult the Certificate of Analysis.*

**Application and treat level**

Markets	Coatings industry Ink industry Polish industry Paper industry Plaster industry Leather industry
Applications	Water-based coatings Polishes Shoe- and leather care Printing inks Paper Plasters Renders
Recommended dosage/usage	1,5% - 2,5%

**Key benefits**

- APEO/NPEO free -
- Provides very good water-repellent properties.
- Gives a matt gloss.
- Improves surface smoothness.
