

Typical chemical and physical properties Biodegradable wetting agent for aqueous lacquers and paints. Improves the open time and enhances the flow and leveling properties.

Blend of polyalkylene glycols, dispersants and polyhydroxy-amide.

Appearance	Liquid
Solubility	
Water	Miscible
Density at 25°C	1,05 - 1,10 g/ml
pH at 25°C	6,0 - 8,0
Viscosity at 25°C	50 - 120 mPa·s

This information is intended as a guideline only. For specifications please consult the Certificate of Analysis.

Application and treat level

Markets	Coating industry Ink industry Cleaning industry
Applications	Coatings and lacquers Paper coatings/impregnation Printing inks (OPV) Cleaner agents
Recommended dosage/usage	0,5 -2,0 % wt. based on total formulation
	Suitable as Food contact material

Key benefits

- Readily biodegradable -- PFAS Free -- Free of MOSH/MOAH -- Free of silicone oils -
- The multifunctional nature allows to provide the necessary wetting properties for water based systems such as paints, adhesives, printing inks.
- Low-foaming wetting agent.
- Improves penetration.
- Improves wetting on wood substrates.
- Increases open time of emulsion-based lacquers.
- Reduces surface tension suitable for application on wood and glass substrates.
- No labelling.

Safety and Handling	Please read Safety Data Sheet (SDS) before handling.
Product Specification	This information is available on request through our local representative.
Packaging	This information is available on request through our local representative.
Storage	The product should be stored at a temperature of no less than 10 °C and no more than 25 °C and away from light. For more safety details read the Safety Data Sheet (SDS)
Quality Policy	The objective of our quality policy is the continuous fulfillment of the internal and external requirements agreed upon with our partners with regards to everybody's performance. ☐ The Quality System of ADDAPT® Chemicals BV is based on the principles of the NEN - EN - ISO - Standard 9001:2015.
Liabilities	<i>All recommendations for the use of our products, whether given by us in writing, orally, or to be implied from the results of tests carried out by us, are based on the current state of our knowledge. Notwithstanding any such recommendations, buyer or user remains responsible for satisfying himself that the products as supplied by us are suitable for his intended process or purpose. Since we cannot control the application, use or processing of the products, we cannot accept responsibility thereof. Buyer has to ensure that the intended use of the products will not infringe any third party's intellectual property rights. We warrant that our products are free from defects in accordance with, and subject to, our general conditions of sale and supply.</i>
