

**Typical chemical and physical properties**      Foaming agent for emulsion based acoustic ceiling and wall coatings/plasters/renders.

**Proprietary blend of surface-active compounds.**

**Application and treat level**

|                          |                                                                 |
|--------------------------|-----------------------------------------------------------------|
| Markets                  | Acoustic coating industry<br>Acoustic plasters/renders industry |
| Applications             | Acoustic coatings<br>Acoustic plasters/renders                  |
| Recommended dosage/usage | 0.5 - 2.0 % based on total formulation                          |

**Key benefits**

- Readily biodegradable -- VOC free -- APEO free -- Solvent free -- PFAS Free -- Free of MOSH/MOAH -- Free of silicone/siloxane -
- The foaming creates excellent insulating and sound-dampening characteristics in emulsion-based acoustic ceiling and wall coatings/plasters/renders.
- Coating weight of spray systems formulated can be reduced resulting in more cost-effective usage.
- The open structure created will reduce normal levels of sound but is not intended for use where extreme sound reduction is necessary.
- Improves the stability of the formulated system.
- Easy to use due to its moderate viscosity.
- Excellent spray adjuvant at low concentrations.
